

S O T E R

VINEYARDS

The Willamette Valley is Oregon's most recognized appellation for cool climate wines, and it is in the Northern part of this Valley where the finest vineyards are found. Wines of the Origin Series are a reflection of the unique climates, geographical features, and growing conditions that embody each distinctive region where we source our grapes. Preservation of place is essential to our winemaking philosophy, and in accordance with our environmental principles, all of the vineyards we work with are at a minimum certified sustainable.
